Corey Stewart, Chairman, Prince William Board of County Supervisors
Pete Candland, Prince William Board of County Supervisors, Gainesville District Supervisor

Dear Chairman Stewart and Supervisor Candland,

Billy Casper Golf (BCG) is aware that Dominion Virginia Power intends to submit plans to the Virginia State Corporation Commission for 230kv transmission lines in Prince William County. We have grave concerns regarding the impact the "Northern Route" will have on Heritage Hunt Golf & Country Club, a Senior 55+ community.

Our firm was honored to be selected by the Heritage Hunt members and community to manage their investment. As a worldwide leader in the golf industry, we take great pride in our partnerships. To hear Heritage Hunt risks losing three holes on its golf course was stunning. Clearly, if the Northern Route was to be selected, it would render the course unplayable with no viable land or design to replace the holes. The impact to BCG would be significant; however, the economic impact and loss in quality of life to the residents and community would be catastrophic. Championship courses have and will always be 18 holes – and nothing less!

BCG is fully committed to protecting our stakeholders. The only feasible solution for the power lines and the one I fully support is the I-66 Hybrid Route. It is clearly the best option and meets the needs of all interested parties.

Very truly yours,

Alex Elmore
