Haymarket Electric Transmission Line Project – Informational Meeting

AT DOMINION ENERGY, we are committed to working safely and courteously in your neighborhood. You are receiving this postcard because we are preparing to begin construction on the Haymarket 230 kV Electric Transmission Line Project in Prince William County, Virginia. The Virginia State Corporation Commission (SCC) approved this project along the overhead/underground I-66 Hybrid Route in July 2018.

Construction activities are scheduled to begin in fall 2019. Our goal is to complete construction on this 5.3-mile line by the end of 2021. After construction is complete and the line is energized, restoration will begin and will last into 2022.

We invite you to an informational meeting to learn more about the construction process for this project. There will not be a formal presentation at this meeting, but our electric transmission construction experts will be on hand to answer any questions you may have about the project. You will also be able to view a video overview of project construction and access the project's interactive web portal.

Your electric service will not be interrupted by this project. Thank you for your understanding and patience as we work to maintain reliable electricity in your neighborhood.

INFORMATIONAL MEETING

Thursday, Sept. 5, 2019
6 – 8 p.m.

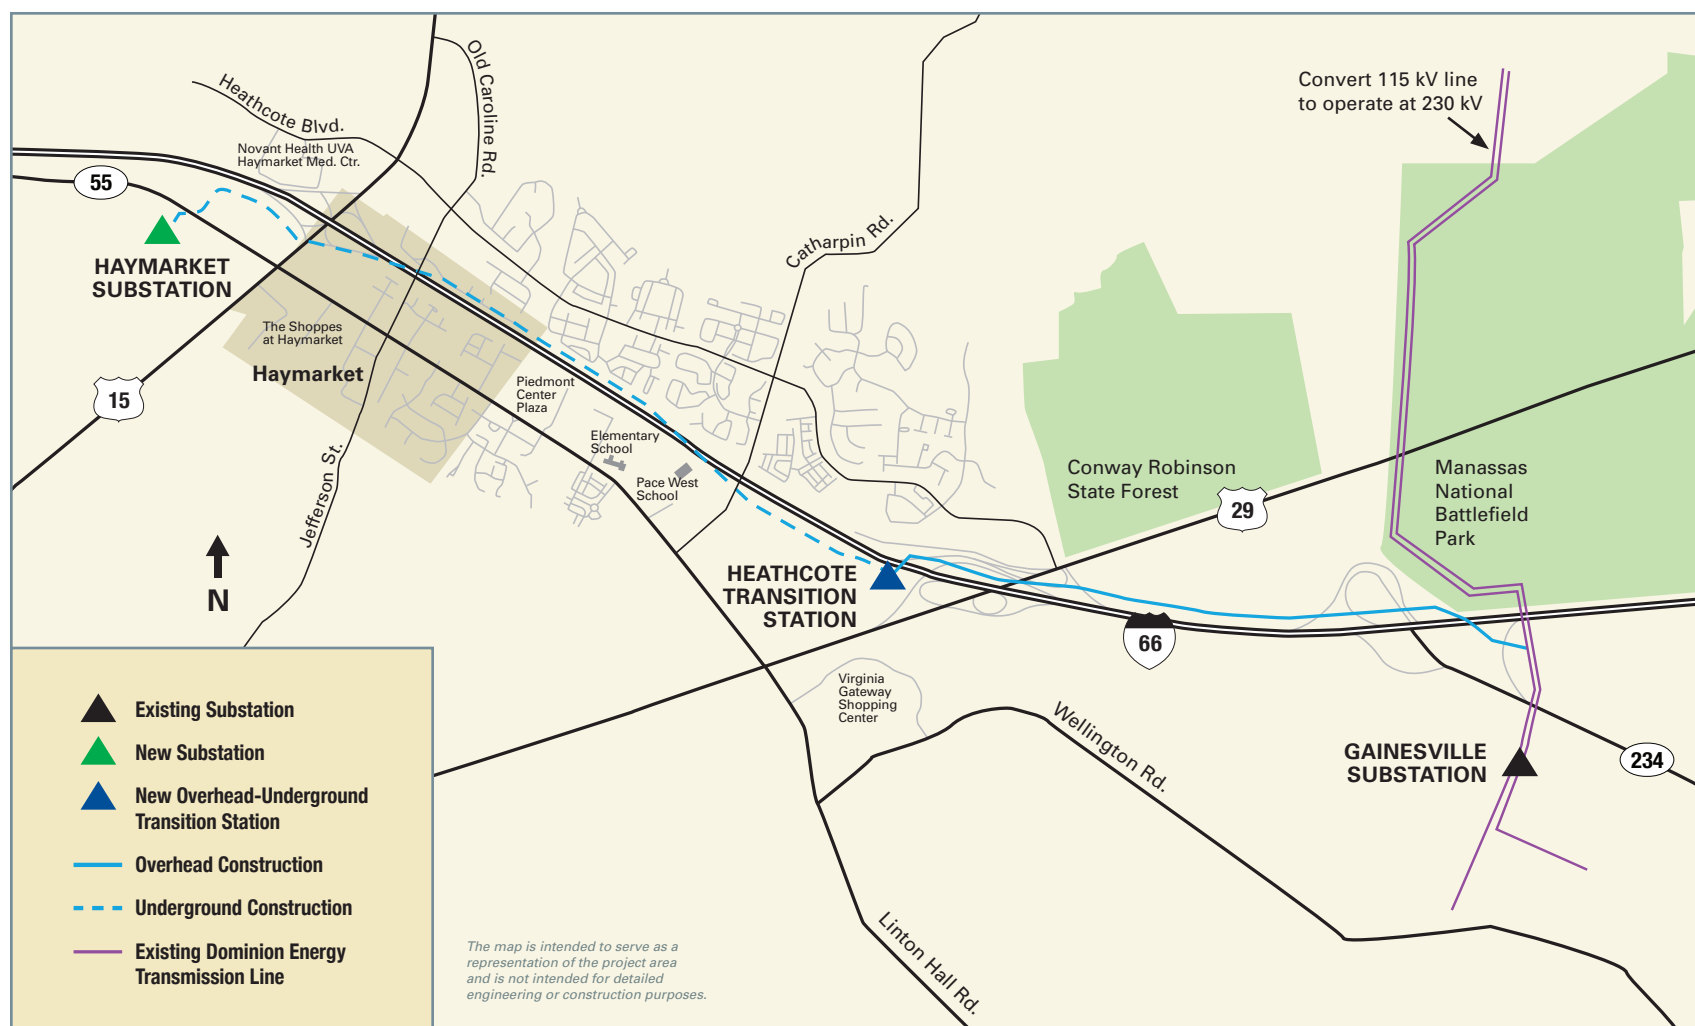

Battlefield High School
Cafeteria

15000 Graduation Drive
Haymarket, Virginia 20169

(drop by anytime during these hours)
