

January 14, 2022

The Honorable Jeanine Lawson
Prince William County Brentsville District Supervisor
1 County Complex
Prince William, VA 22192

Dear Supervisor Lawson,

The Lake Manassas Residential Owners Association takes the opportunity to commend you on your leadership in protecting the rural crescent of Prince William County from ill-advised development, as contained in County's Comprehensive Plan Amendment. We read with great interest your comments in the Bull Run Observer, on the construction of Data Centers in the Pageland Lane area. We, like you, have major concerns of what this proposed construction's impact will be on the Manassas Battlefield National Park, traffic, and critical forested areas.

While the proposed construction would have minimal direct impact on our community, we cannot see how this project provides any significant financial benefit to the County or job creation for county residents that would offset the negative environmental impact of the project.

We have also been contacted by Paula Daly, of the Heritage Hunt Data Center Work Group requesting our support in opposing the Pageland development, as such we will work to inform our residents with accurate information and how to voice their opinions to the appropriate authorities.

Again, thank-you for all you do, not only for our and surrounding communities, but for all of Prince William County.

Sincerely,
The Lake Manassas Board of Directors,

Don Minogue, Gary Border, Robert Hale, Shashi Mehta, Joseph Greenlee
